GROUNDWORKER APPRENTICESHIP

**Build Your Future from the Ground Up:
Start Your Apprenticeship with Rihoy & Son**

Become a Groundworker

Groundworkers play a key role in preparing construction sites for new buildings and infrastructure. They handle critical early tasks like excavation, laying foundations, and installing drainage systems to ensure all other construction work has a solid start.

Is This Role for You?

Ideal for those who:

- Enjoy outdoor work.
- Value precision and teamwork.
- Are physically fit and prepared for hands-on tasks in varying weather conditions.

How to apply

Please contact sarah-jayne.brewin@jwriho.com to find out more.

Key Responsibilities

Excavation: Prepare sites by digging and leveling the ground.

Drainage: Install drainage systems to manage water flow and prevent damage.

Foundations: Lay strong bases for buildings and structures.

Concreting: Set up sub-bases, shuttering, and reinforcement for concrete work.

Paving & Kerbing: Install paving and kerbs to complete roads and pathways.

Skills You Need

Physical Fitness: Ability to handle physically demanding tasks.

Technical Skills: Knowledge of excavation, drainage, and foundation work, plus machinery operation.

Attention to Detail: Precision in site preparation.

Safety Awareness: Understanding and following safety guidelines.

Career Progression

Start as a groundworker and explore paths to:

Specialisation in areas like drainage or concreting.

Supervisory roles such as Team Leader or Site Foreman.

Advanced roles like Plant Operator or Management with further training.
